SUMMARY OF INFORMATION

During this session, I could see that there was an underground tunnel. Men climb inside and outside of the tunnel and there is an object that is placed here. The object is narrow and is pointed at the end. It is covered with a cloth when placed inside the tunnel. In the background, I could see quite a few structures.

I then could see the white object which I described during session 02. This object was flying sideways and I saw the object flying downward. I never saw this object flying upward. At one point I could see a white cloud that looked like an explosion that was caused by this object. I then saw a man with the object over his head. It looked as though he was carrying the object. I then saw the man with the object under him. It looked as though he was holding the object. I then saw the front portion of the object being wheeled by a man. See sketch.

I saw large clamps. These clamps ~~to~~ hold the object into place when the object is not in use.

I do not know if the object that goes into the tunnel is the same ~~as~~ as the white object that flies.

At one point, I saw an object that was pointed at the top

and was set on the ground by a man. It looked as though the man was placing a thick board under the object. The top of the object twirled and twirled. Sometimes, however the top of this object spreads out and has silver thongs that are sharp.

Again, I do not know if this is a separate object or the same object that I described in session 02.
